Note-taking Writing

二、英文作文.

The situation that students work part time is more and more common in recent years. One of the reasons that students work part time is that they want to earn some money during vacation or after school so that they have enough "pocket money" to buy things they want. Some of the senior high students earn money to buy latest cellphones, fashion shoes by working part time. The second reason is that some students would rather work part time than studying. They think that they can learn the skills which are meaningful than just study.

If I work part time, the reason I do so is that I want to learn the skills which can not get from books and teachers. I want myself become a ^{more} humble, passionate and responsible person through working. Besides, it will be the first income I earn. I can know that it is not easy to earn money, so I will cherish the things I own.
